

RMVR Exceptions and Clarifications To
1984 GCR for A, C, D, and Sports 2000 Sports Racers
8-18-2010

1. **Eligibility:**
 - a) SCCA ASR, CSR, DSR sports racers as raced through 1984.
 - b) Sports 2000 (S2) through 1984.

2. **Background and philosophy:** Sports Racers must be prepared as they were during their competitive racing period. Since racing technology progressed very rapidly during this period, there may be different specifications that are period correct.

3. **Modifications:** Since these cars mostly raced in open categories, there will be variations within a particular make and model that are period correct. **Sports Racers are expected to have only period equipment and specifications.** It is the responsibility of a competitor to provide documentation for any specification that is not generally considered appropriate. All competitors are expected to do research and comply with any appropriate period regulations.

4. **Approved tires:** Racing slicks and treaded tires. While exact size and aspect ratio are not specified, entrants must ensure that tire choice is appropriate for the car during the eligibility period.

5. **Safety:** All RMVR safety regulations must be included in the car construction. In the case of conflict with 1984 SCCA GCR safety requirements, the more stringent will be required. Safety fuel cells are required.

6. **Partial List of eligible Sports Racers:** The list below are examples of sports racer models covered by this rule. It is not intended to be all-inclusive, definitive, or limiting. As with any car submitted to eligibility, it is the owner's responsibility to have the car prepared consistent with the rules of the era and to provide adequate proof of eligibility for cars not listed. The Eligibility Committee has final authority to approve applications.

Sports 2000 (through 84):	CSR/DSR (through 84):
Aquila RO82S	Arachnid
